SUMMARY

Full-stack software engineer with 4+ years building production web apps, REST APIs, and LLM-powered features in TypeScript, Python, Java, and C#/.NET on AWS and Azure, across e-commerce and financial services.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, C#, C/C++, SQL, HTML/CSS
Frontend & Testing: React, Next.js, Angular, Tailwind CSS, Vitest, Jest, Cypress, Selenium
Backend: Node.js, REST APIs, Microservices, Kafka, Spring Boot, ASP.NET Core, FastAPI, Hibernate, Medusa
AI & LLM: OpenAI API, Claude API, LangGraph, Langfuse, MCP, Automated Code Analysis for Security and Performance
Cloud & DevOps: AWS (Lambda, SQS, CDK), Azure AKS, Docker, Kubernetes, GitHub Actions, Jenkins, CI/CD, Git, Linux
Data & Payments: PostgreSQL, MongoDB, DynamoDB, Oracle, MySQL, Supabase, Prisma, Stripe

EXPERIENCE

Quill and Pigeon | Full Stack Software Engineer Co-op Jan 2025 - Aug 2025

- Shipped Next.js, React, TypeScript, and PostgreSQL features for a multi-tenant commerce platform with 500+ registered users and 1,000+ completed orders
- Designed and built a subscription-credit system on Medusa and Stripe with a PostgreSQL credit ledger, line-item reservations, atomic rollbacks, and idempotent webhooks so duplicate Stripe events cannot issue credits twice
- Developed a customer-facing AI chatbot used by 50+ users with React and Vercel AI SDK, along with n8n workflows for OpenAI/Claude failover and Langfuse tracing. Also built a Python MCP server on AWS Lambda to give AI agents access to product data
- Built an event-driven AWS email pipeline (SES, SNS, SQS, Lambda, CDK) in TypeScript that parses and threads inbound mail into PostgreSQL and drives an AI auto-reply loop that has sent 250+ replies
- Co-implemented Next.js performance fixes with the founder, cutting production page-load time 50% (Vercel Analytics)
- Wrote unit and integration tests that maintained 90% Vitest coverage in CI, reviewed pull requests, and managed staging-to-main releases

Tata Consultancy Services | Full Stack Web Application Developer Aug 2020 - Aug 2023

- Implemented Node.js REST APIs and Kafka producers and consumers for trade and account events, and deployed microservices to Kubernetes on Azure AKS as workflows moved out of a monolith
- Delivered tax and transaction-processing features in C#/.NET, ASP.NET Core, and Angular for a U.S. investment-management client, plus 20+ reusable Angular and React components
- Cut .NET batch and MongoDB/DynamoDB processing time ~15% by batching work, reusing reference data, and tuning queries and indexes, measured in Splunk and CloudWatch
- Promoted twice in three years; managed biweekly Jenkins releases, mentored four junior developers, and wrote regression tests with Jest, Selenium, and Cypress

Cradiant IT Services | Software Engineer Jun 2019 - Jul 2020

- Built ~20 Java/Spring Boot REST endpoints for client records, search, and reporting with Oracle, Hibernate, and SQL
- Wrote a C/C++ tool that compressed ~1 GB reports to ~280 MB, saving ~10 GB of storage per day
- Automated Oracle reporting with a Python and Pandas pipeline, cutting reporting time ~40%

PROJECTS

F1 Race Briefing | Next.js, Python, FastAPI, LangGraph, Gemini Jan 2026 - Sep 2026

- Designed a 4-step LangGraph agent where Gemini picks data tools (OpenF1/FastF1, OpenWeather, Tavily), runs them in parallel, and streams a 6-section race briefing that still completes if a tool fails

Real-Time Collaborative Kanban Board | Next.js, WebSocket, Supabase Sep 2025 - Dec 2025

- Built a real-time Kanban board with live multi-user sync, load-tested with 100+ concurrent users

EDUCATION

Northeastern University | Master of Science in Computer Science, GPA: 4.0/4.0 | May 2026
Savitribai Phule Pune University | Bachelor of Engineering in Computer Engineering, GPA: 9.7/10 | May 2020

AWARDS & LEADERSHIP

Runner-up, Northeastern Idea Pitch Competition (2024) | Star Performer, TCS (2021) | Squash Club President (2025)
